## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Yim et al. (US 6,530,784 B1).

Yim teaches a display apparatus (fig. 2) comprising: a monitor (20) on which pictures are displayed, brackets (150) installed on the monitor and having slits (151) on opposite sides of each bracket, spring brackets (170) combined to the brackets and having locking members (175) inserting into the brackets through the slits, and stands (120) having locking grooves (127) selectively inserted into the brackets and locked in the locking members of the spring brackets (shown in fig. 5) (claims 1 and 7-8); wherein the locking members of the spring brackets elastically combine with the stands (shown in fig. 5) (claim 2); wherein each of the stands comprises: a stand base (110), and a stand shaft (123) rotatably installed on the stand base and having locking grooves (127) engaged with the locking members of each of the spring brackets (shown in fig. 5)

Art Unit: 2835

(claim 3); wherein the brackets are box-shaped (shown in fig. 3) and support the stands to maintain a control point of the stands (claim 4); wherein a side of each of the brackets which faces the monitor is opened and a bottom of each of the brackets which faces the stands is opened (shown in fig. 3) (claim 5); and a method of assembling a display apparatus being disclosed in the specification (claim 6).

### ***Allowable Subject Matter***

3. Claims 9-10 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: The best prior art of record, Yim et al. (US 6,530,784 B1), fails to teach or fairly suggest a display apparatus comprising at least: brackets installed on a monitor and having recesses on opposite sides, spring brackets which fit around the brackets and having locking members inserted into the bracket through the recesses, and stands inserted into the brackets and locked by the locking members as set forth in claim 9; and spring brackets installed on a monitor and having locking members, brackets inserted into the spring brackets and comprising recesses with locking members of the spring brackets inserted therethrough, and stands inserted into the brackets and locked by the locking members as set forth in claim 10.
